## ABOUT ME

Cloud and DevOps enthusiast on a mission to become an **AWS Solutions Architect**, building scalable, automated, and intelligent cloud infrastructure. Hands-on experience in AWS, Python, Terraform, Docker, and CI/CD pipelines. Passionate about Infrastructure as Code, workflow automation with N8N, and cloud-native architectures. Available for immediate joining as a Cloud and DevOps Intern.

## EXPERIENCE

### Web Developer Intern

EMglitz | Offline | Client Project Work

- Worked on-site with the EMglitz team on a live client project involving custom web development.
- Built an interactive Car Scrolling Showcase feature — a dynamic scrolling UI component that displays car models with smooth scroll-triggered animations, enhancing the client's product presentation experience.
- Collaborated directly with the client to gather requirements, iterate on designs, and deliver production-ready frontend code.
- Gained hands-on experience in responsive UI development, cross-browser compatibility, and client-facing communication in a professional offline work environment.

## SKILLS

|              |                                                                                                                                                                  |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Cloud        | AWS EC2, S3, IAM, VPC, Route 53, CloudWatch, Auto Scaling, Load Balancer, AWS CLI, RDS, Lambda, SNS, SQS, EventBridge                                            |
| IaC / DevOps | Terraform, N8N Workflow Automation, Jenkins, Docker, CI/CD Pipeline Creation, Automated Build and Deployment, Webhook Integration, GitHub Actions                |
| Networking   | IPv4, CIDR, Subnetting, TCP/IP, DNS, HTTP/HTTPS, SSH, Public and Private Networks, VPC Networking Fundamentals                                                   |
| OS / Linux   | Linux (Ubuntu, Amazon Linux), Cron Jobs and Task Scheduling, User and Group Management, File Permissions, Package Management, Process Monitoring, Shell Commands |
| Programming  | Python (Automation, API Integration, Scripting, File Handling, JSON Processing), Bash Scripting                                                                  |
| App Dev      | Authentication (JWT, Refresh Tokens, Sessions), REST APIs, Flask Development                                                                                     |
| Databases    | Firebase (Firestore and Realtime DB), SQL, Amazon RDS                                                                                                            |
| Tools        | Git, GitHub, Postman, Nginx, Render, Netlify, Vercel                                                                                                             |
| Soft Skills  | Problem Solving, Debugging, Team Collaboration, Continuous Learning, Technical Documentation                                                                     |

## CERTIFICATIONS AND LEARNING

- AWS Cloud Practitioner - Amazon Web Services (Pursuing)
- AWS Solutions Architect Associate - Amazon Web Services (Pursuing)
- AWS Cloud Practitioner Course - GeeksforGeeks (Pursuing)
- AWS Solutions Architect Associate Course - GeeksforGeeks (Pursuing)
- Python Fundamentals - Infosys (Completed)
- Technology Job Simulation - Deloitte Australia via Forage
- Web Developer Intern - EMglitz (Completed)

## PROJECTS

### - Seed to Circuit

AI-based smart farming platform for plant disease detection, soil analysis, and crop recommendations. Achieves 90% accuracy in fertilizer recommendations by leveraging real-time NPK sensor values for dynamic disease prediction and precise nutrient-based crop suggestions.

Tech: Python, Flask (SSR), Firebase, Teachable Machine | Deployed on Vercel, Render

- AI-Based Certificate Verification System

Verifies certificates using OCR and Gemini 2.0 Flash by validating ID and QR code with source authenticity.

Tech: Python, Flask (SSR), OCR, Gemini 2.0 Flash API | Deployed on Render

- Gen-Z SaaS Task Tracker

Cloud-based task management application with gamification and productivity tracking.

Tech: Node.js (SSR), Firebase, HTML, CSS, JavaScript | Deployed on AWS

ACHIEVEMENTS AND EXTRACURRICULARS

- Google Gemini Student Ambassador

Selected as a student ambassador for Google Gemini, representing AI tools and cloud technologies on campus.

- Hackathon Winner - VCET College

Secured first place at VCET College hackathon competing against teams from multiple institutions. Prize: Rs. 50,000.

- Hackathon Winner - KPR College

Won first place at KPR College hackathon with an innovative tech solution. Prize: Rs. 10,000.

- Runner-Up - SVCE College National-Level Hackathon

Achieved second place at a national-level hackathon hosted by SVCE College. Prize: Rs. 10,000.

- Runner-Up - CATCH Hackathon 2025

Secured second place at the CATCH Hackathon 2025 among participants from multiple colleges.

- Best Innovation Award - Sengundar Engineering College

Recognised for the most innovative project at Sengundar Engineering College technical fest.

- Winner - Technical Project, CATCH Competition

Secured first place in the technical project category at CATCH Competition. Prize: Rs. 5,000.

- Winner - 3+ Project Expo Competitions

Consistently won at multiple project expo events across different engineering colleges.

EDUCATION

B.E - Electrical and Electronics Engineering (Final Year)

Mahendra Engineering College, Namakkal

2023 - 2027

CGPA: 8.02

HSC (12th Grade)

Government Higher Secondary School (GHSS)

2023

77%
